LEDLENSER
ABOUT US

Many revolutionary products first saw the light of day in a garage. This was also the case with the first Ledlenser. When Harald and Rainer Opolka founded the company Zweibrüder Optoelectronics in 1993, they really didn't have much more than a garage, an old Atari computer, a set of tools, a sketchpad and around 1,000 Deutschmarks in seed capital.

Today, the company that started in a garage is an international flashlight and headlamp manufacturer that remains globally unmatched. With over 1,000 employees worldwide, we share the aim of improving a little every day – in everything we do. We are therefore continually expanding our product range, scrutinizing even tried and tested ideas and increasingly relying on sustainable energy sources.

KEYPOINTS

- One of the global market leaders in LED flashlights and headlamps
- More than 1,000 employees worldwide
- In-house development, production and quality assurance
- More than 15 years of experience and know-how
- Worldwide collaboration with over 45 master distributors
- Locations in Germany, Italy, Japan and Switzerland
- More than 100 industrial property rights including e.g. patents, utility models and designs
- Over 200 awards, distinctions and test ratings for more than 70 of our flashlights and headlamps

LEDLENSER
QUALITY GUARANTEED

7 YEAR WARRANTY[4]

GERMAN ENGINEERING & DESIGN

To us, „German Engineering & Design" is not just an empty phrase -it means the highest expectations in technology, design, innovation, materials, workmanship and sustainability. We hold more than 100 industrial property rights. These include patents, utility models, and designs. Furthermore, we are proud of having received various design awards for our products.

Since we are confident in the quality of our lights, virtually all of our products are covered by a five-year warranty[4] - but there's more: Upon product registration, our customers have the option of extending the warranty to seven years.

All original Ledlenser products covered by our warranty include a product registration card. To register the product, scan the QR code with a smartphone or enter the indicated URL on a laptop or PC.

[4] Information on page 80

LEDLENSER MARKETING SUPPORT

You can count on a well-thought-out marketing plan with effective and flexible marketing strategies or similar and substantial sales support.

CUSTOMER COMMUNICATION

– Brochures
– Advertisements in special-interest publications
– 360° Campaigns
– Social media
– Online advertising

SALES SUPPORT

– Retailer information
– Sales promotions
– Training / instruction

POS-COMMUNICATION

Our display line brings the Ledlenser experience to life at the POS.

Simply contact your Ledlenser representative to find the optimal display for your sales support offers

TRADE SHOWS AND OTHER EVENTS

Take part in our activities and sell products at large events with minor investments.

Simply contact our sales representatives or key account managers to find out which events functions are taking place in your area.

LEDLENSER TECHNOLOGIES

Having the leading edge comes down to the best technology. From innovative lenses to pioneering power supplies – we work tirelessly to advance our technological edge. The highlights of our technology:

ADVANCED FOCUS SYSTEM

Galileo swore by the power of lenses; Newton by the power of reflectors. We have simply combined the two technologies – only better than anyone before. The result: our patented Advanced Focus System (AFS), which allows a seamless transition from homogeneous low beam to sharply focused high beam. The efficiency of the AFS even has experts thrilled.

SMART LIGHT TECHNOLOGY (SLT)

This innovation turns a Ledlenser into your personal lighting tool: A micro-controller allows individual ranges of functions to be programmed to different touch and switch combinations. That way, you always have the perfect light mode at hand.

X-LENS TECHNOLOGY

This technology is an enhancement of the Advanced Focus System (AFS). It can merge virtually any number of reflector lenses and synchronizes their individual light beams into a perfect beam, resulting in a high-grade, homogeneous floodlight in unfocused mode and our most sharply focused high beam to date.

OPTISENSE TECHNOLOGY

Whether it's dusk, shady, dim or pitch-black: Thanks to Optisense Technology, your Ledlenser automatically adapts to the present light conditions. The innovative dimmer controls the luminosity based on the reflection of its own light and prevents annoying glare.

FLOATING CHARGE SYSTEM

Wireless charging: With the Floating Charge System which can be wall-mounted and the magnetic charging cable, the light is ready to use with a simple flick of the wrist. In addition to charging via USB, with an adapter the system can also be plugged into standard outlets or connected to cigarette lighter plugs in cars.

WIDE BEAM

Our wide beam format takes into account that the human field of vision is around 180° degrees horizontally and only around 130° degrees vertically. The oval shape of the light and the Wide Beam technology makes things twice as safe: not only allowing you to see more, but also to be seen from every angle.

[3] Information on page 80

RAPID FOCUS

When you focus and defocus the flashlight or headlamp, our reflector lens moves in relation to the LED. In order to create the fastest and most ergonomic process possible for users, we developed Rapid Focus: a single-hand operated mechanism used to change the light mode at lightning speed.

SAFETY YTRION CELL

A Safety Ytrion Cell is considerably lighter than a nickel-metal hybrid battery and charges up to five times faster than a lithium-ion battery. Plus it offers more than 5,000 charge cycles with virtually zero capacity loss due to "memory effect".

NATURAL LIGHT

In some situations, not all light is the same. Ledlenser therefore not only supplies extremely bright, but also extremely natural light: Natural Light produces light with a color rendering index (CRI) over 90. This ensures true color rendering, even in the deep red color range.

DUAL POWER SOURCE

Our Dual Power Source allows you to use the full performance of your Ledlenser at any time – no matter what power source you have available. Because this technology recognises the power source. You can therefore choose between the rechargeable Ledlenser battery or a disposable battery. Extremely practical for long trips without a power point.

POWERBANK

Even in the remotest corners of the world, you'll never again have to worry about any device's battery running out. Ledlenser lights have a Power Bank function so they can easily be used as charging stations to recharge any device quickly via a simple USB connection.

TEMPERATURE CONTROL

Our lights stay cool, even when they work hard: Thanks to the intelligent and fully automated temperature control, a Ledlenser never gets too hot, no matter how much it's used. This protects you from burns and the LED from overheating.

EMERGENCY LIGHT

This feature turns your flashlight into an emergency light: If the power goes out while your Ledlenser is on the charging base, it will automatically turn on. So the light helps you find your way around, e.g. to the breaker panel.

MICRO PRISM TECHNOLOGY

Our innovative lens technology features an optical microstructure, which provides both glare-free light distribution and high efficiency at the same time. It ensures a downward beam that is up to three times stronger than conventional scattered light lenses and therefore provides optimal light distribution in the room, regardless of whether the light sits on a table or hangs from the ceiling. It creates a brighter view, whether used indoors or outdoors.

COOLING TECHNOLOGY

Cooling Technology (CT) ensures your head stays cool even when your lamp is at maximum power. Our CT products reduce LED heat to the optimal level by means of the intelligent use of cooling elements. This technology is also used to cool computer chips and ensures highly efficient use of energy, increased illuminating power, and especially long-lasting LEDs.

LEDLENSER
LIGHT FUNCTIONS

BOOST

A temporary burst of light.

STROBE

Quick flashes of light with an irritating blinding effect for emergency situations.

POWER

A bright light for any situation.

BLINK

Automatically emits light pulses at regular intervals.

MID POWER

Sufficient light output for extended battery life.

POSITION

Regular light pulses at long intervals for position marking.

LOW POWER

Economical light for long battery life, glare-free reading and working.

S.O.S.

The light emits an SOS distress signal in Morse code (3 x short, 3 x long, 3 x short).

PULSE

The light intensity keeps rising and decreasing evenly.

IP PROTECTION CLASSES

IP PROTECTION TYPE ACCORDING TO EN 60529 **IP56**

1st digit: Solid particle protection
2nd digit: Protection against liquids

1ST DIGIT:
SOLID PARTICLE PROTECTION

0	No protection against particles
1	Protection against ingress of solid particles with diameters of >50mm
2	Protection against ingress of solid particles with diameters of >12,5mm
3	Protection against ingress of solid particles with diameters of >2,5mm
4	Protection against ingress of solid particles with diameters of >1mm
5	Protection against harmful dust deposits inside
6	Protection against ingress of dust (dust-tight)

2ND DIGIT:
PROTECTION AGAINST LIQUIDS

0	No protection against water ingress
1	Protection against vertically dripping water
2	Protection against angled dripping water (15° tilt)
3	Protection against spraying water (up to 60° angle)
4	Protection against splashing water (from all directions)
5	Protection against water jets (from all directions)
6	Protection against powerful water jets
7	Protection against water ingress with brief immersion
8	Protection in case of indefinite immersion

To achieve the protection rating, the light must be fully closed and the focus system, if featured, should not be moved.

P17R

THE HIGHLIGHT OF THE P-SERIES.

1000 lm[1]
450 m[1]
60 h[1]

01 – Emergency Light - Be prepared for power outages.

02 – Focus Lock - fixes the current level of focus in place.

03 – Easy to use - fast switching and focusing with only one hand!

04 – Intelligent controls - thumb-selection of all SLT functions via soft touch.

05 – Sustainable rechargeable battery technology - it's safe, without any significant loss of capacity and one of the most efficient technologies with 5000 charging cycles.

06 – Full control of your power status – battery indicator and charge indicator.

07 – Comfortable Charging - via Floating Charge System

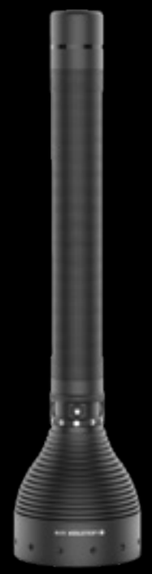
X21R UPDATE

5000 lm[1]
800 m[1]
40 h[1]



01 – Revolutionary rechargeable battery system Safety Ytrion Cell for fast charging and more than 5,000 charge cycles without any noticeable capacity loss.
02 – Always ready: Floating Charge System with bracket for convenient charging and storage.
03 – Extreme beam range of 800 m1 thanks to High Intensity LEDs and adjustable focus.
04 – Very easy to operate – 8 light modes, 4 light programs, 2 energy modes, and 1 multi-function switch.
05 – Seamless change in the light beam – Rapid Focus.
06 – Fast Acton Switch for easy and precise light mode selection.

220 lm[1]
130 m[1]
20 h[1]

01 – Rechargeable battery with USB charging cable - eco-friendly, functional, no need for expensive disposable batteries.
02 – Easy operation - one switch, three light modes (Power, Mid Power, Low Power, Blink).
03 – Everything at a glance - pivoting head.
04 – Glare-free red LED with strobe function.
05 – One white Power LED.
06 – Optisense Technology - controls luminosity based on reflecting light.
07 – Enhanced close-up and distance visibility - variable focus feature.
08 – Removable and washable head straps.

H14R.2

LET SOMEBODY ELSE DO THE HEADWORK.

1000 lm[1]
300 m[1]
35 h[1]

01 – Rechargeable and ready to take on extremes - powered by rechargeable or normal batteries.
02 – Dimming - efficient and seamlessly adjustable light modes (e.g. dim to as low as 5 lumen).
03 – Well informed - three-level battery charge indicator and low battery alert.
04 – More safety and visibility - rear light feature can be added.
05 – Everything at a glance - 90° pivoting head.
06 – Quickly change the light beam using one hand - Rapid Focus.
07 – Enhanced close-up and distance visibility - seamless focus feature of homogeneous, circular low beam (defocused) to a sharply bundled high beam (focused).
08 – Ultra-bright, brilliant light beam - Xtreme LED.

PACKAGING AND LOGISTICS

	Blister
Item number	500943
GTIN	4058205012072
Packaging dimensions (mm)	150 x 240 x 95 (W x H x D)
Tare weight (g)	430
Contents	1 rechargeable battery, USB cable
Price, MSRP (€)	69.90

[1-5] Information on page 80

FLASHLIGHTS
ACCESSORIES

USB Car Charger – 0380

This handy USB car charger adapter fits into any cigarette lighter. So you can even charge the Ledlenser on the road.

Intelligent Clip Type C - 0317

Use this convenient belt clip to simply carry the Ledlenser flashlight on your pants, keeping your hands free.

The clip can be rotated 360° thereby transforming the light into a flexible spotlight.

Car Charger – 0386

This handy 12 Volt car charger with integrated cable fits into any standard cigarette lighter. So you can even charge your Ledlenser on the road

Remote Switch – various item nos.

The Remote Switch allows you to turn on your Ledlenser remotely - quietly, without jerking or shaking. To install, simply replace the end cap on your light with the remote switch end piece.

Universal Mounting System
Item no. 0362

This sturdy universal holder safely holds lights 25 to 34 mm in diameter and can be flexibly attached to tripods and otherbars.

Universal Mounting Bracket various item nos.

This sturdy universal mount allows you to quickly and easily mount flashlights to tripods or other bars.

GoPro-Adapter-Set
Item no. 501034

Ledlenser meets GoPro: The light mount for a Ledlenser flashlight can also be used for a GoPro, including compatible systems and accessories. The adapter is made of aluminum and therefore extremely tough and durable. It can be mounted to bars without any additional tools and the 360° swivel means maximum flexibility.

Roll Protection – Item no. 0313

This roll protection is essential for pros as well as your average Joe: It simply attaches to the front of the flashlight and stops it from rolling away on sloping surfaces. The ring also protects the flashlight head from scratches.

Tripod
Item no. 500993

Its low weight, excellent sturdiness and load capacity of up to 1000 g make the tripod the perfect companion on the road. The ¼" screw thread and additional adapters allow the tripod to be used with a wide range of Ledlenser products.

NOTES

The information pertaining to package contents, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change package contents, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and misprints excepted.

1) Measurements according to ANSI FL1 on the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (Lumen/lm) and beam distance (meters/m) on the highest setting and to the run time (hours/h) on the lowest setting. If the light is equipped with color LED(s), the measurements indicated apply to white light or white LED. A boost function (if applicable) can be used several times, but only for short periods of time. If the light has different energy modes, measurement is based on "energy saving mode."

2) Calculated capacity value in watt-hours (Wh) or milliampere hours (mAh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

3) EP Patent 1880139; US Patent 7,461,960

4) Five year warranty from the date of purchase, or seven years with online registration through our website. The warranty applies worldwide; legal warranty rights also apply. It covers defects in material and manufacture. Battery packs are guaranteed to work correctly for 24 months. This warranty does not cover products in the "Solidline" series, Ledlenser K1 and Ledlenser K2, as well as defective batteries, holsters, pouches, remote switches, color filters, imprints and surface coatings. The warrantor is Ledlenser GmbH & Co. KG, Kronenstr. 5-7, 42699 Solingen, Germany. For more information visit ledlenser.com/warranty

5) Charging time may vary by power supply.

Ledlenser GmbH & Co. KG
Kronenstraße 5-7, 42699 Solingen, Germany.
VAT ID no.: DE815242425, Amtsgericht Wuppertal, HRA 23078
Personally liable partner:
